Uncle Sam Says

How time flies! That's a common expression you've used repeatedly. Keep it in mind when you think about your future and what you can do to make your future secure? There's no trick to security. Just enroll today in the payroll savings plan where you work. Every pay day from now on you'll be setting aside, in United States Savings Bonds, money that actually grows. In 10 short years you'll be getting back $100 for every $75 you're wisely setting aside today.

U. S. Treasury Department

Got your Problems, Mr. Farmer?

New powers arise every day, don't they? Jobs to be done, choices you'd like to perform simply and quickly to save valuable time.

Here's a tip: To help solve those problems, keep your eyes glued to our regular column of practical farming suggestions—the column that's packed with helpful hints to make your job easier. Be sure to read

FARM TOPICS
in every issue!

Risky to Sit with Driver

Safest position in a car is in the driver's seat behind the protection of the steering wheel, and the most dangerous seat is the one next to the driver, according to Dr. Claire L. Straith, chief of plastic surgery at Harper hospital, Detroit. He stated in a report in the American Medical association journal that in a study of 50 patients who suffered facial injuries in automobile accidents 70 per cent of the patients were young women who had been sitting next to the driver. More than half of those front seat patients suffered head and face injuries.

C. S. Farm Workers

U. S. land army of farmers, working members of their families, and hired helpers totaled 10,568,000 on May 1, 1948. Total U. S. population is now about 140 million, so each farm worker must feed himself and 12 other U. S. residents besides having any surplus for export. The number of farm workers on May 1 was about 100,000 greater than on the same date in 1947.

Short-Circuited Juke Box Sounds Its Own Fire Alarm

PHILADELPHIA — James Fitzgerald shook his head, blinked the sleep from his eyes. He was right. The strains of "Four Leaf Clover" filled his bedroom—at 2:30 a.m.

The music was coming from the taproom below his second-story apartment. But the taproom was closed.

He stumbled down the stairs and found smoke pouring from the taproom.

It took firemen an hour to put out the blaze in the short-circuited taproom juke box. The short circuit had set the machine in operation

Smart Dog Proves That He Has a Mind of His Own

SANFORD, N. C.— Marvin Johnson has an awfully smart dog.

When the deadline for getting dogs vaccinated rolled around, he said he asked his wife in the dog's presence to remind him to have it vaccinated. Both forgot about it.

Later, Johnson's telephone rang and the veterinarian said the dog was waiting to go home and had been vaccinated.

"Who brought him?" Johnson asked, somewhat startled.

"No one," said the doctor. "He just dropped by."

Lead Pellets in Gizzard Cause Poisoning of Ducks

ST. PAUL.—Lead shot that never hit any ducks may nevertheless be responsible for the present alarming decline in the duck population, suggests Vincent H. Reid, of the Minnesota division of game and fish.

Gizzards of 1,664 wild ducks which were analyzed in his study contained lead shot in slightly over 9 per cent of all cases.

The ducks had picked up the pellets along with their food from the shallow bottom mud.

It is known that such gizzard pellets can cause lead poisoning which may affect the ducks' ability to reproduce, if it does not kill them outright.

The problem of lead poisoning from spent shot is becoming more acute, Reid says, because increasing numbers of hunters are now shooting over Canadian and western waters where the main breeding grounds are.

Washington Zoo Acquires Air-Conditioned Arctic Fox

WASHINGTON.—The National Zoological park recently acquired an alopex lagopus, Arctic fox, that is, which has the secret of how to keep warm in winter and cool in summer.

Zoo experts said that the vicious little animals feel no cold until the thermometer plunges to 94 degrees below and are not affected by heat until the temperature hits 104 degrees above.

The trick is in the fox's fur which is a virtually perfect insulation against all known kinds of weather.

British Mother, 101, Summons Son, 73, With Bugle Calls

LONDON.—Although it was her birthday, Mrs. Ellen Walker, who keeps house for her bachelor son at their cottage in the Yorkshire village of Bretton, was busy as usual wringing out newly washed curtains.

"I think it is time I had some help," she said. For Mrs. Walker is 101 years old. Her son is 73.

Every day she stands at the cottage door and summons her son from his vegetable garden to his midday meal. She uses a miniature bugle.

"At one time," Mrs. Walker said, "I could blow a full-sized army bugle but I haven't enough puff these days."

Since she took an automobile trip to London two years ago, Mrs. Walker has had a hankering for an airplane flight. She has eight children, 16 grandchildren, 40 great-grandchildren and two great-great-grandchildren.

(11tp) Appomattox, Route 3.

Attendant Rescues Boy, 9, From Clutches of Elephant

McKEESPORT, PA. — A circus elephant picked up a 9-year-old schoolboy, tossed him to the ground and was about to crush him with his forefoot when an attendant came to the rescue.

The boy, Robert Yednak, was watching the Roger Brothers circus set up for a one-night stand when he was attracted by Shirley, the elephant.

He fed the elephant some hay when the animal suddenly grabbed him with his trunk, lifted him into the air and slammed him to the ground.

Just as the elephant raised its foot to crush the youth, a quick-thinking attendant shouted a command for the animal to "freeze." Robert then rolled from where Shirley was chained.

He suffered a dislocated shoulder.

NOTICE: Prompt service on covering buttons, buckles and belts. Hems let down, and other alterations. Mrs. Bertha Martin,
(1tv) Hotel Appomattox

FOR SALE: FRYERS. 45c per pound.

NOTICE TO THE PUBLIC

Notice is hereby given to our customers that the Southside Electric Cooperative has filed with the State Corporation Commission an application for permission to increase its rates to become effective on bills rendered on and after September 1, 1948.

The new rates to become effective on that date will provide for an increase of five (5) mills per kilowatt hour for each step of rate schedules "RS", "CS", "GP" and "LP." No change is proposed in the minimum monthly charges of these rate schedules.

The above increases are requested to meet increased operating costs and to produce sufficient income to maintain the Cooperative's property in a sound physical and financial condition to render adequate and efficient service, as required by the Electric Cooperative Act.

(1tc) Appomattox, Va.

Dairy Farmers Cash in on Test-Tube Breeding of Cows

NEW BRUNSWICK, N. J.—A decade of test-tube breeding of milk cows has succeeded far beyond the hopes of the 100 pioneers.

It was just 10 years ago that New Jersey Co-operative Artificial Breeding Association Unit No. 1—first of its kind in the nation—got underway on a farm in Somerset county.

Now, a million dollars in extra income a year is being grossed by dairy farmers taking part in the project.

Enos J. Perry of the New Jersey State College of Agriculture here launched the program among 100 farmers.

He had visited Denmark where he witnessed co-operative artificial breeding.

Perry was surprised at the speed with which dairymen accepted the revolutionary idea that put the New Jersey bull in the shadow of a test tube.

The original 100 Jersey farmers have been joined by thousands more in 42 states. There were 1,500 cows enrolled in the pioneer project. Now there are 1,000,000 in the nation giving better returns to their owners because of "test tube" breeding.

Flying Police Trooper Flogs Errant Pilot to "Pull Over"

PONTIAC, MICH.—Concealed by the sun's brilliance, like a traffic policeman behind a billboard, Henry A. DeLooff, state police trooper, flagged down and ticketed an errant flier.

The arrested man, Pfc. Richard J. Koester, 20, on leave from the marines in Washington, paid a $20 fine to Justice Burt I. Lockwood. The charge was reckless flying.

DeLoof said he watched Koester take off "like a cowboy" from the Pontiac airport. The policeman took over another plane and followed Koester 18 miles, with the rays of the sun as a shield.

He said Koester made two low dives over populated areas. After the second one DeLooff set down beside Koester and gave him the same signal traffic policemen use to flag motorists to a curb.

"You should have seen his face when I flew alongside him," the trooper commented.

Koester was arrested after he landed.
